Office Action Summary

Applicant's election of Group I and polyethylene oxide in Paper No. 21 is acknowledged. Because applicant did not distinctly and specifically point out ~~the~~ any errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Royce in view of Folkers et al.

Royce et al teach directly compressible dosage form using polyethylene oxide as a binder (abstract). Drugs without limitation are disclosed (column 4 lines 44-45).

Folkers et al disclose ^{that} ~~that~~ fluvastatin is well-known in the art as an HMG-CoA reductase inhibitor.

It would have been obvious to one of ordinary skill to deliver fluvastatin in the vehicle of Royce to achieve the beneficial effect of an HMG-coA reductase inhibitor in view of Folkers et al.

5/31/03
Claims 1-4, ¹5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 the location of the ^{drug} ~~page~~ is unclear. Does the matrix contain the active?

NO claims allowed.
